Unsurpassed Quality in Rotary Boards

Beech & Maple Rotary

TECHNICAL INFORMATION

General Properties:

- Manufactured on custom, proprietary equipment made specifically for dieboard production assuring straight edge cuts and unmatched dimensional stability.
- Annual rejection rate is less than 1%.
- Only the best veneers are used for all plies.
- Inside Diameters ranging from 6-7/8" (174.62mm) to 29-5/16" (744.5mm) and lengths ranging from 41" (1041mm) to 122" (3098.8mm).
- Three wrap lengths available: Standard, Extended and Long.
- Fast availability throughout the country from our network of warehouses or right from your own warehouse utilizing our Consignment Program.

Apaulo has over 30 years in bent wood production beginning in furniture, then musical instruments and now rotary dieboards.

Our rotary boards are only made out of Beech and Maple. Other wood species have been tried but the inconsistency of the densities within the grain pattern make for a very unstable board whenever dry or excessively moist air is present. Warp, twist and rock are greatly avoided by using only the best available veneers. The majority of the boards we sell are Beech however if you or your customer demands Maple, we have these available for immediate delivery as well.
